

Neurology TALKS

Neuropathy and dementia: two diseases with a common cause

Eva Feldman

Dr. Feldman, MD PhD, is the Director of the University of Michigan ALS Center of Excellence. In addition to her active clinical practice in neurology and position as the Russell N. DeJong Professor of Neurology at the University of Michigan Medical School, Dr. Feldman directed the A. Alfred Taubman Medical Research Institute until 2017.

Dr. Feldman is Past President of the Peripheral Nerve Society (PNS) and served as President of the American Neurological Association (ANA) from 2011 to 2013, the third woman to hold this position in 130 years. Dr. Feldman's numerous honors include both the Early and Distinguished Career Development Awards from University of Michigan and being an elected member of the Association of American Physicians and National Academy of Medicine. She was named a 2018 Honorary Fellow of the ANA, and recently honored with the 2019 PNS Alan J. Gebhart Prize for Excellence in Peripheral Nerve Research. In 2020, Dr. Feldman assumed the Chair of the Neurology and Psychiatry Section for the National Academy of Medicine.

She currently runs her own 30-scientist laboratory, the NeuroNetwork for Emerging Therapies, and is the principal investigator of two first-ever FDA approved human clinical trials of intraspinal stem cell implantation therapy for ALS.
